Dear Steve:

Enclosed is your new laboratory accreditation certificate and scope of accreditation. These documents supersede all previous versions.

Your scope of accreditation is an important document because it identifies the parameters, by technology, for which your laboratory maintains accreditation in the aqueous and non-aqueous matrices. If your laboratory is certified in the drinking water matrix, the scope of accreditation also identifies the parameters and methods for which your laboratory is certified. It is critical that the scope of accreditation be reviewed carefully for errors. **It is your responsibility to make sure that the scope of accreditation agrees with your understanding of the matrices, technologies, parameters, and any drinking water methods for which your laboratory maintains accreditation in Wisconsin.**

If you believe that your Scope of Accreditation contains errors or you would like to discuss how to get reinstatement for any lost parameters, contact the Laboratory Accreditation Program Chemist immediately at 920-412-5970 or by email at Tom.Trainor@wisconsin.gov.

Sincerely,
